

The **DYER HEAVY DUTY** molded series is a one-piece fiberglass composite construction made with rigid thixotropic resins and 30% chopped strand glass to a thickness of 3/16". The enclosure is insulated with a 2 lb. polyurethane foam with an R-19 value. The outside surface is white polyester gelcoat with a UV inhibitor. The FRP base has a 1-1/2" mounting flange around the bottom for anchoring. The enclosure is equipped with (3) 7" cast aluminum handles, a 30# spring-loaded hook on the front and (3) 4" x 3" ss hinges on the rear. Fasteners are 1/4" stainless steel nuts & bolts. A ss hasp is also included. Other specifications are available for special needs.
